

120-K

Coding element
Accessories

This coding element is used for the pin strips and plug connectors of the series 110, 120, 121 and 122.

For each pole, the pin strips have a trapezoidal coding slot in which the coding element 120-K can be inserted.

In the standard version the coding elements have a bright red colour, making them clearly visible in mated condition. Alternatively, they are also available in light grey and white.

The white coding elements are made of a high temperature resistant material and are best suited for the application of SMD and THR suitable products. Delivery is in bulk in a bag.

The red and light grey coding elements are not reflow solderable and for SMD & THR products they can only be used after the soldering process. 12 coding elements are related on a strip together.

Part Numbers

120-K	Colour	PU
30.496.026	white	100
20.496.025	red	120
17.496.025	light grey	120

General Information

Usable with series 110, 120, 121, 122

Material

Moulding PA, V-0, colour please see part numbers
PA HT, white, V-0

Comparative Tracking Index CTI ≥ 600

Insulating Group I

Temperature Range -40°C up to 100 [1]; -40°C up to 120°C (max. 260°C; 15-30 s) [2]

[1] apply for PA, V-0

[2] apply for PA HT, V-0
